## TERMS OF ACCEPTANCE & CONSENT TO CARE

As a Chiropractic facility we have one main goal, to detect and correct/reduce the vertebral subluxation complex. **Chiropractic** is a science and art, which concerns itself with the relationship between structure (primarily the spine) and function (primarily the nervous system) as that relationship may effect the restoration and preservation of health. **Health** is a state of optimal physical, mental and social well-being, not merely the absence of disease or infirmity.

One disturbance to the nervous system is called a **vertebral subluxation**. This occurs when one or more of the 24 vertebrae in the spinal column become misaligned and/or do not move properly. This causes alteration of nerve function and interference to the nervous system. This may result in pain and dysfunction or may be entirely asymptomatic.

Subluxations are corrected and/or reduced by an **adjustment**. An adjustment is the specific application of forces to correct and/or reduce vertebral subluxation. Our chiropractic method of correcting subluxations is by specific adjustments of the spine and is done by hand or instrument in this office. In addition, ancillary procedures such as physiotherapy and/or rehabilitative procedures may be included.

If during the course of care we encounter non-chiropractic or unusual findings, we will advise you of those findings and recommend that you seek the services of another health care provider. We do not offer to diagnose or treat a disease or condition other than vertebral subluxation. Regardless of what a disease is called, we do not offer to treat it, nor do we offer advice regarding treatment prescribed by others. **Our Only Practice Objective** is to eliminate a major interference to the expression of the body's innate wisdom and ability to heal.

As with any healthcare procedure, there are certain complications that may arise during chiropractic manipulation and therapy. Possible complications include but are not limited to the following: muscle strain, dizziness, nausea, flushing, fractures, disc injuries, dislocations, cervical myelopathy, burns, costovertebral strains and separations. It is not uncommon for patients to experience temporary soreness after the first few treatments. In rare cases, manipulation of the neck has been associated with injuries to the arteries in the neck, leading to or contributing to serious complications, including stroke.

Fractures are rare occurrences and generally result from underlying weakness of the bone for which the Doctor of Chiropractic checks during the taking of the patient's history, and during examination and X-ray. The incidences of stroke are exceedingly rare and are estimated to occur between one in one million and one in five million cervical adjustments. The other complications are also generally described as rare.

The availability and nature of other treatment options may include the following:

- Self-administered, over-the-counter analgesics and rest
- Medical care and prescription drugs
- Surgery

There are risks and benefits associated with all the above treatment options, which the patient may wish to discuss with his/her medical doctor. Remaining untreated may allow the formation of adhesions and reduce mobility, which may set up a pain reaction further reducing mobility. Failure to seek care could result in serious medical conditions going unrecognized.

### WOMEN ONLY:

To the best of my knowledge I **am/am NOT** pregnant and **give permission/do NOT give permission** to x-ray me for diagnostic interpretations.

**I have been informed of the nature and purpose of chiropractic care, the possible consequences of care, and the risks of care, including the risk that the care may not accomplish the desired objective. Reasonable alternative treatments have been explained, including the risks, consequences and probable effectiveness of each. I have been advised of the possible consequences if no care is received. I acknowledge that no guarantees have been made to me concerning the results of the care and treatment.**

**I HAVE READ THE ABOVE PARAGRAPH. I UNDERSTAND THE INFORMATION PROVIDED. ALL QUESTIONS I HAVE ABOUT THIS INFORMATION HAVE BEEN ANSWERED TO MY SATISFACTION. HAVING THIS KNOWLEDGE, I KNOWINGLY AUTHORIZE LEGACY CHIROPRACTIC TO PROCEED WITH CHIROPRACTIC CARE AND TREATMENT.**
